DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 2615.
2. Claims 41-42 have been added. Claims 1-42 are pending and are addressed in this office action.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. Claims 1, 17, 24-28, 31, and 34-40 recite, "determining a direction of the power". It is unclear how a power can have a direction. Power, in this case assumed to mean air pressure, is a scalar value, that exists at each point in the sound field (three directional space). Also the direction has no reference point the examiners best assumption is that

Art Unit: 2615

it is to mean determining the direction of the sound events from the users current position, which could be anywhere in space.

6. Claims 1, 17, 24-28, 31, and 34-40 recite the phrase "channel pair" and "channel pairs" followed by "comprising multiple audio channels". It is unclear what this is intended to mean. Perhaps "consisting of a pair of audio channels" is intended.

Currently it is not clear if a "channel pair" is referring to exactly two channels or two groups of channels.

7. Claims 1, 17, 24-28, 31, and 34-40 recite, "determining whether a sound field is intended for production in one channel pair". The term "sound field" is known to one of ordinary skill in the art as a "region containing sound waves". It is unclear what is intended by the claim, given the statement "determining whether a region is intended for production in one channel pair" makes no sense.

Claim Rejections - 35 USC § 101

8. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

9. Claims 26, 27, and 38-40 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

10. Regarding claims 38-40, an electromagnetic signal does not constitute statutory subject matter.

11. Regarding claims 26-27, the claims pertain an apparatus comprising only of logic, which is an abstract idea and thus does not constitute statutory subject matter.

Conclusion

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
